To all, note that the action plan proposes that folks work on messaging first thing Monday, including what we tell the residents about why EPA involvement now. I'm confident you all would and will handle that well but know there is some concern in the regional office about what we say. While I think Rich and Ann going to Dimock on Monday and starting to get the lay of the land is good, let's be sure we are also tied in at meetings or calls to the extent appropriate so we understand the message.

In terms of coordination with the state, Rich you should do your normal thing. There will also be some communication at executive levels in PADEP by EPA sr mgrs as noted in the action plan.

While on travel Monday I will stay connected thru Jerry and will be available most of the day by cell.

Good luck and thanks to all, dennis.

Trish/Dave:

The Action Plan that Dennis put together and Shawn is sending to HQ includes getting started asap on a door-to-door survey to gather info. Ann and I are planning to be in Dimock on Monday to be a part of that, but I see that as your lead. Let me know your game plan. I also want to get a feel for the situation at the 2 residents where we have knowledge of contamination. I plan to be in the Dimock area by Noon on Monday.

Rich.
